

Country context*	Population (000s)	127,144	Life expectancy at birth (years)	84
	GNI per capita (PPP Int \$)	37,630	Total health expenditure (% GDP)	10.3
	Physician density (per 10 000 population)	2.30	ICT Development Index rank	12
	Nurse & midwife density (per 10 000 population)	11.49	Mobile-cellular subscriptions (% population)	110.91
	Hospital bed density (per 10 000 population)	137	Internet users (% population)	79.1

1. eHealth foundations

National policies or strategies			
	Country response	Global "yes" response [§]	Year adopted
National universal health coverage policy or strategy	Yes	75%	‡
National eHealth policy or strategy	Yes	58%	2014
National health information system (HIS) policy or strategy	Yes	66%	2014
National telehealth policy or strategy	No	22%	N/A
Funding sources for eHealth			
	Country response	Global "yes" response [§]	Funding source %**
Public funding	Yes	77%	‡
Private or commercial funding	Yes	40%	‡
Donor/non-public funding	—	63%	‡
Public-private partnerships	Yes	42%	‡
Multilingualism in eHealth			
	Country response	Global "yes" response [§]	Year adopted
Policy or strategy on multilingualism	Yes	28%	‡
Government-supported Internet sites in multiple languages	—	48%	
eHealth capacity building			
	Country response	Global "yes" response [§]	Proportion**
Health sciences students – Pre-service training in eHealth	—	74%	N/A
Health professionals – In-service training in eHealth	Yes	77%	N/A

2. Legal frameworks for eHealth

Policy or legislation – purpose	Country response	Global "yes" response [§]
Defines medical jurisdiction, liability or reimbursement of eHealth services such as telehealth	Yes	31%
Addresses patient safety and quality of care based on data quality, data transmission standards or clinical competency criteria	Yes	46%
Protects the privacy of personally identifiable data of individuals irrespective of whether it is in paper or digital format	Yes	78%
Protects the privacy of individuals' health-related data held in electronic format in an EHR	Yes	54%
Governs the sharing of digital data between health professionals in other health services in the same country through the use of an EHR	—	34%
Governs the sharing of digital data between health professionals in health services in other countries through the use of an EHR	—	22%
Governs the sharing of personal and health data between research entities	Yes	39%
Allows individuals electronic access to their own health-related data when held in an EHR	Yes	29%
Allows individuals to demand their own health-related data be corrected when held in an EHR if it is known to be inaccurate	—	32%
Allows individuals to demand the deletion of health-related data from their EHR	—	18%
Allows individuals to specify which health-related data from their EHR can be shared with health professionals of their choice	—	28%
Governs civil registration and vital statistics	Yes	76%
Governs national identification management systems	—	65%

3. Telehealth

Telehealth programmes country overview

	Health system level**	Programme type**
Teleradiology	National	Established
Teledermatology	Local	Informal
Telepathology	National	Established
Telepsychiatry	Local	Informal
Remote patient monitoring	National	Established

4. Electronic Health Records (EHRs)

EHR country overview

	Country response	Year introduced
National EHR system	No	N/A
Legislation governing the use of the national EHR system	‡	
Health facilities with EHR	Use EHR	Facilities with EHR %**
Primary care facilities (e.g. clinics and health care centres)	N/A	‡
Secondary care facilities (e.g. hospitals, emergency care)	N/A	‡
Tertiary care facilities (e.g. specialized care, referral from primary/secondary care)	N/A	‡
Other electronic systems	Country response	Global "yes" response§
Laboratory information systems	N/A	35%
Pathology information systems	N/A	18%
Pharmacy information systems	N/A	33%
PACS	N/A	26%
Automatic vaccination alerting system	N/A	10%
ICT-assisted functions	Country response	Global "yes" response§
Electronic medical billing systems	Yes	58%
Supply chain management information systems	—	58%
Human resources for health information systems	Yes	69%

5. Use of eLearning in health sciences

eLearning programmes country overview

Health sciences students – Pre-service	Country response	Global "yes" response§
Medicine	Yes	58%
Dentistry	Yes	39%
Public health	Yes	50%
Nursing & midwifery	Yes	47%
Pharmacy	Yes	38%
Biomedical/Life sciences	Yes	42%
Health professionals – In-service	Country response	Global "yes" response§
Medicine	Yes	58%
Dentistry	Yes	30%
Public health	Yes	47%
Nursing & midwifery	Yes	46%
Pharmacy	Yes	31%
Biomedical/Life sciences	Yes	34%

6. mHealth

mHealth programmes country overview

Accessing/providing health services	Health system level**	Programme type**
Toll-free emergency	National	Established
Health call centres	National	Established
Appointment reminders	Local	Pilot
Mobile telehealth	Intermediate	Established
Management of disasters and emergencies	Intermediate	Established
Treatment adherence	‡	‡
