National policy/strategy for women's and children's health exists	Yes
Policy/strategy refers to the use of eHealth, mHealth or social media	Yes

eHealth systems

An overview of the types of eHealth systems in place, their purpose and level

Electronic information system collects and reports births, deaths and causes of death data	Yes – partial coverage
Year introduced	2011
At least one electronic information system exists at the district level to collect and report health data	Yes
Resource tracking system in place to report total health expenditure by financing source, per capita	Yes
Type of resource tracking system	Both
Resource tracking system level	National level, Regional/District level
Resource tracking system in place to report total reproductive, maternal, newborn, and child health (RMNCH) expenditure by financing source, per capita	No
Type of resource tracking system	Both
Resource tracking system level	National level, Regional/ District level, Local level

Monitoring the status of women's and children's health

An overview of the measurement of the 11 CoIA indicators by monitoring frequency and format

Indicator measured	Monitor	Frequency	Format: Paper, Electronic, or Both
Maternal mortality ratio	Yes	Every 5 years	Both
Under 5 child mortality with the proportion of newborn deaths	Yes	Every 5 years	Both
Children under 5 who are stunted	Yes	Every 5 years	Both
Met need for contraception	Yes	Every 5 years	Both
Antenatal care coverage	Yes	Every year	Both
Prevention of mother-to-child HIV transmission (PMTCT)	Yes	Every year	Both
Skilled attendant at birth	Yes	Every 5 years	Both
Postnatal care for mothers and babies	Yes	Every year	Both
Exclusive breastfeeding for six months	Yes	Every 5 years	Both
3 doses of the combined diphtheria, pertussis and tetanus vaccine	Yes	Every year	Both
Antibiotic treatment for pneumonia	Yes	Every year	Both

eHealth initiatives – national overview

eHealth supports major women's and children's health initiatives	Yes
Funding sources	Public funding, Donor funding, Public-private partnerships

Possible barriers to implementing eHealth services

The most important barriers hindering the implementation of eHealth services

Leadership, governance and policy - country policy or strategy does not include eHealth as an approach to support women's and children's health	Yes
